Cyber attacks can affect our technology and banking industry. The tips listed on this infographic can reduce vulnerabilities.

It is also important to build an emergency kit with food, water, medical supplies, etc. in preparation for technology issues at stores. Keep in mind that you will need supplies for each member and pet in the family. It is important to save and keep some cash on hand for needed supplies in the event of technology failing.

Have a backup plan for if communications fail including a local and non- local meeting place for the family.

Are you a Victim of a Cyber Attack?

Contact all financial service companies of your accounts to alert them your personal information is compromised, and to place holds on or close compromised accounts.

File a complaint or report with the appropriate entity including the Office of Inspector General, FBI Internet Crime Complaint Center, Federal Trade Commission, or any applicable state and local agency.

Keep computer systems up to date.

Install security software on computers and phones

Have a secure Internet connection

Back up files regularly to an encrypted file or external storage device.
